

*It can detect cancer early,  
helping save lives.*

# P.E.T. Imaging

*Now there's daily and convenient  
access to one of the most powerful  
and accurate diagnostic imaging  
machines available.*

**It's Quad-Cities' first permanently located  
Positron Emission Tomography (PET) scanner  
located at the RG Imaging Center, Davenport.**

## **P.E.T. can:**

- **Aid in differentiating cancerous and non-cancerous tissues.**
- **Identify where cancer has spread.**
- **Reveal whether chemotherapy and radiation therapy are effective.**
- **Determine the extent of heart disease.**
- **Help diagnose some neurological disorders, like seizures.**

**The latest technology is here to stay.**

*Conveniently  
located in the  
RG Imaging Center*

*1970 E. 53rd Street  
Davenport, Iowa*

*For more information,  
speak with your doctor  
about PET or call  
(563) 359-3931.*
